Product Manager

Product Owner / Product Manager with 5 years of progressive experience in product development, business analysis, agile execution, and stakeholder management within the BFSI and enterprise SaaS domains. Proven expertise in translating complex business needs into scalable product solutions, driving user-centric innovation, managing cross-functional agile teams, and delivering data-driven results. Strong background in financial services particularly in commercial banking, workflow automation, supply chain, UI/UX and quality assurance. Passionate about building impactful products that optimize processes, reduce risk, and enhance customer experience

EXPERIENCE

JPMorgan Chase & Co | 2.5+ years (Nov 2022 - Present)| Bengaluru, India

Role: **Associate Product Owner**

Project 1: SMART(Strategic Multi Asset Tool) June 2025 – Present

Owned product delivery for SMART, a risk grading application developed for Commercial Term Lending (CTL) within the Commercial Real Estate (CRE) space, enabling credit risk teams to assess borrower creditworthiness at both origination and servicing stages. The tool generates automated PD-based risk scores (4 = Low Risk to 8 = High Risk), supporting credit decisions during both origination and servicing stages

✅ **Impact & Results**

- Automated 90% of borrower grading (~4M documents/year), drastically reducing manual intervention for Credit Risk teams.
- Enabled Credit Officers to focus only on high-value KRG (Key Relationship Group) loans > $25M.
- Improved compliance, turnaround time, and operational scalability across Commercial Real Estate portfolios.

Project 2: Covenant Monitoring Automation (AI Workflow Tool) Nov 2024 – May 2025

Led the automation of end-to-end covenant monitoring processes by orchestrating a unified workflow system that integrated document intake, credit monitoring, and financial statement spreading teams. Designed and implemented AI-enabled document classification and data extraction, significantly reducing manual intervention.

✅ **Impact & Results**

- Reduced document processing time from ~45 minutes to under 10 minutes using AI/ML-based data extraction.
- Automated classification of 50+ document types, improving process accuracy and speed.
- Achieved $6–8M in annual savings, equivalent to 130–150 FTEs, through operational efficiency.
- Built foundational infrastructure for scalable automation, with dashboards and telemetry for future product insights.

Project 3: Aurora Studio & WaaS (Workflow as a Service) Loan Servicing Transformation WF Tool Nov 2023 – Oct 2024

Pioneered the product strategy and rollout of Aurora PRIME, a scalable SaaS platform that streamlined 4M+ annual loan servicing requests across 400+ shared mailboxes in the WLS division. Replaced legacy Outlook-based workflows with a transparent, traceable, and configurable solution using a low-code/no-code admin UI (Aurora Prime Studio).

✅ **Impact & Results**

- Consolidated and standardized workflows across 200+ mailbox owners with tailored logic per business line (Flow, Structured, CRE, Specialty).
- Reduced email request SLA breaches and eliminated data silos, improving loan processing speed by 30–40%.
- Enabled business-led configuration and publishing of workflows—zero dev dependency for production changes.

Cognizant | 2 years (Jan 2021 – Nov 2023)| Bengaluru, India

Role: **Business Analyst** | **Client: Loblaw Companies Limited**

Managed end-to-end functional, regression, and automation testing for 50+ enterprise applications across supply chain, procurement, logistics, and ERP systems.

- Built automation test suites using Robot Framework and reduced manual test efforts by 35% while maintaining 98% defect closure SLAs & Conducted IDoc validation for SAP SCM, ensuring data integrity across supply chain processes.
- Delivered weekly QA sign-offs, led defect triage meetings, and presented status updates to client stakeholders.
- Recognized for automating 300+ manual test cases, integrating new processes, and consistently ranking as top defect reporter.

SKILLS

Product Ideation, Design & Strategy | Roadmap Planning | Market Research | Product Lifecycle Management (PLM) | User Story Writing | Requirements Gathering | Agile (Scrum, Kanban, SAFe) | Sprint Planning | Backlog Prioritization | Stakeholder Management | Customer-Centric Design | User Research | UI/UX Design (Figma, Wireframing, Prototyping) | Acceptance Criteria Definition | Prioritization Frameworks (MoSCoW, RICE, WSJF) | OKRs & KPIs Definition | Cross-Functional Team Leadership | Communication & Presentation | Change Management | Process Optimization | Workflow Automation | Risk Management | Go-To-Market Strategy | Agile Product Ownership | Release Management | Lucid Chats | Visio | Excel | PowerPoint Presentations

Technical Skills: Camunda BPMN | JIRA | Confluence | Robot Framework (BDD Framework) | Jenkins | GitLab | Alteryx | JMeter | SAP | SQL | Python (Beginner level) | Testing Automation | Functional & Regression Testing | Integration Testing | UAT Coordination | JSON/XML Data Structures | Test Management Tools (qTest,) SDLC & STLC | Error Reporting & Debugging | Documentation (BRD, FSD, User Manuals | API Integration (REST) | Microservices Architecture.

EDUCATION

Vellore Institute of Technology, Chennai | B.Tech in Electrical & Electronics and Engineering 2017-2021

CGPA – 9.13
